Caregrip Anti-slip Pallet Layer Sheets

Our anti-slip pallet layer sheets improve the stability of your pallets.

The unique coating on our anti-slip sheets reduce the movement of palletised goods when in transit, therefore improving safety and reducing damage.

Performance and benefits

- Available in rolls or as pre – cut sheets in a range of thicknesses
- Reduces the amount of shrink film or palletising glue needed
- Improves pallet stability and prevents movement in transport
- Manufactured with FSC Recycled 100% certified paper which means it is a sustainable option
- Meets transport safety standards (DIN 12195-1) to improve safety of loads
- Protective surface which avoids scratches and shaking damage
- Keeps goods uniform without need for excessive secondary packaging
- Takes up to 10X less space than traditional materials, meaning less storage, handling and reloads

Caregrip Sheet Dispenser | Palcut

The Palcut Dispenser is a fully automated dispenser which cuts Caregrip paper to the desired length from a roll.

The sheet dispenser is designed for use in companies with high street usage where automated palleting operations have to run continuously.

Performance and benefits

- Prevents pickup of more than one sheet at a time which eliminates downtime
- Number of hopper reloads is reduced by up to 90%
- Quick running of robot as only one sheet can be dispensed (no sheet drops)
- Always the same place for the interlayer pickup
- Easy integration with the palletisation systems control
- Automatic changing of up to 15 interlayer sheet sizes so no need to store multiple sheet sizes
- Easy to install and only requires 230V to operate
- Takes up to 10X less space than traditional materials, meaning less storage, handling and reloads
