Packaging tapes for expert carton sealing

You might not think of packaging tape as being integral to the success of the packaging process – but a high-quality tape will ensure your packaging stays securely sealed while in storage and transit, regardless of temperature or other environmental conditions.

We have a tape to suit every packaging operation – providing great strength, stick and durability, whilst helping to reduce operator downtime and costs. ”

Expert packaging tapes

Whether you require tape for hand or machine application, our range of adhesive tapes have small core sizes and include the highest coat weights and longest roll lengths on the market, meaning less downtime due to, roll changes and waste. Other benefits include.

- Formulated with fast-grab adhesive, meaning tape sticks quickly but won't come unstuck
- Suitable for use in a wide range of environments, with tape suitable for use in temperatures as low as -24°C
- Strengthened tape for less snapping
- Our tapes are created with clean-running adhesive, which prevents build-up and 'balling' on machinery rollers and blades
- Majority of the range is solvent free, therefore providing an environmentally friendly tape solution
- Colour and bespoke printed tape options for differentiation and customised messaging, corporate branding, instructions or health and safety information

Our Range

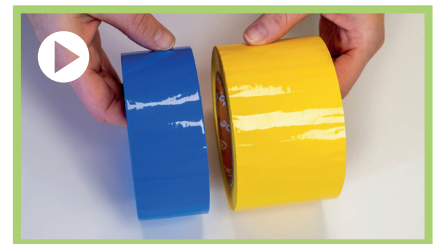

CT™ tape

Our standard range of packaging tape is for general packaging and use in dry and ambient conditions.

Caretape™

Offering sector-beating performance, our premium range of tape for general high-volume packaging in ambient, chilled and frozen conditions (down to -24°C) for both hand and machine application.

Caretape™ Xsol

Solvent adhesive tape with superior adhesion for reliable high-volume packaging in chilled or frozen conditions.

Paper tapes

Plastic-free and 100% recyclable, our environmentally friendly kraft paper is an alternative to standard polypropylene tape.

Bespoke printed tapes

Whether it's a specific message, your branding or health and safety messaging you require printing onto your tape, we can create a bespoke printed tape to your exact requirements.

30% Recycled content tape

Offering the same performance, but less virgin raw materials used. Made with 30% recycled content, and with options available for hand and machine application.
